## SIKA AGRICULTURAL PRODUCTS

SIKA Agricultural Products are designed, manufactured and distributed by PT Engineering (Pty) Ltd. In addition to our standard range of machines, we embrace the opportunity to work with our clients on the design and manufacture of customised equipment. Providing bespoke solutions to our clients is what sets us apart. All our units are supplied ready for use, with PTO shafts included and gearboxes charged with oil.

### STANDARD SLASHER

For use on fields, road sides, farms and general slashing.

Available Cutting Widths: 1.0m – 3.6m. (dual cutting assemblies from 2.4m and larger).

### SIDE DELIVERY SLASHER

For use in orchards.

With an added vortex ring below deck and different blades applied, this machine offers a finer finish and is excellent for lifting, slashing and dispersing mulchings.

Available Cutting Widths: 1.2m – 2.1m.

### ROLLER SLASHER

For use on fields and orchards.

Similar to our standard slasher but with roller action for a finer, smoother finish.

Available Cutting Widths: 1.2m – 2.1m.

### HAYCUTTER

For grass, hay and lucerne cutting.

The Haycutter delivers cuttings into a rear wind row for subsequent hay bailing.

Available Cutting Widths: 1.2m – 3.0m. (dual cutting assemblies from 2.4m and larger).

## **SPEED ROLLER**

For use on sports fields and golf courses.

With a triple cutting assembly this machine offers our finest, closest finish.

Available Cutting Widths: 1.5m – 1.8m.

## **ROLLER MOWER**

For use on sports fields and golf courses.

Similar to our Roller Slasher, but with an added vortex ring below deck with different blades applied this machine offers a finer finish.

Available Cutting Widths: 1.2m – 2.1m.

## **ORCHARD MULCHER**

Excellent application in citrus, macadamia and avocado orchards as well as vineyards.

With side chute delivery and heavy duty dual base plate, this machine offers efficiency in the mulching of pruning's and their return to base of the parent plant.

Available Cutting Widths: 1.3m – 2.1m.

## **CROP MULCHER**

For use on game farms, land clearing and crop mulching.

With a heavy duty dual base plate, this machine is excellent for bushveld clearing up to 75mm diameter.

Available Cutting Widths: 1.3m – 2.1m.

## **VACUUM MOWER**

For use on sports fields and golf courses.

With rear chute delivery the Vacuum Mower is compatible with rear bag catch set up.

Available Cutting Widths: 1.2m – 2.1m.
